

UTILITIES DEPARTMENT

**CITY OF VIROQUA
2016 CONSUMER CONFIDENCE REPORT – 4/10/2017**

Viroqua Utilities is pleased to provide you with the 2016 Consumer Confidence Report (CCR). We routinely monitor for constituents in our drinking water according to the schedule set by the Wisconsin Department of Natural Resources. Bacterial and chlorine levels are tested 4 times per month. There are a number of other constituents tested at different frequencies as shown in the report. This CCR provides the results of monitoring for the period of January 1st to December 31st, 2016. In 2016 the City of Viroqua water met or exceeded federal and state requirements.

At present, there are 2000 water customers serviced by more than 33 miles of pipe. The water comes from deep wells located at Congress Street, Arena Drive and South Washington Avenue. There are two elevated tanks located in Eckhart Park and the Industrial Park. The City chlorinates the water to ensure it is bacteriologically safe. No fluoride is added to the water supply. The system is operated by certified professionals who are required to have continuous education.

If you have any questions about this report or the water utility, please contact Sarah Grainger at 608-637-7154 ext. 20. For further information visit our website at <http://viroqua-wisconsin.com/city-of-viroqua/departments/water-sewer/water-department> or attend a Public Works Committee meeting. The committee meetings are normally held the 1st and 3rd Tuesday of each month at 5 PM. Agendas are posted on our website at <http://viroqua-wisconsin.com/events/category/city-events> or at City Hall, 202 North Main Street.
